

## QG input module for datalogger MS

code: M1040

Thermocouple B (Pt30%Rh-Pt) input. Measuring range +100 to +1800°C.  
Accuracy  $\pm 0.3\%$  from reading + 1.0°C from +300 to +1800°C.  
Linearized, without cold junction compensation. Galvanically isolated.  
Galvanic isolation is not designed as safety protection.

### Technical data
