

Ethernet Multilogger - thermo hygro meter with 4 MiniDIN inputs

code: M1140

Universal datalogger with MiniDIN inputs for connecting up to four temperature and/or humidity probes.

Multilogger can be installed permanently to Ethernet network or work as portable device.

Included is traceable calibration certificate in accordance with EN ISO/IEC17025.

The Multilogger is a battery operated datalogger capable of measuring and recording sensor and electrical values through its inputs.

Datalogger can be connected to Ethernet. Then measured values can be viewed on a web browser, as well as stored and downloaded for later analysis.
