

## Temperature, humidity and CO2 data logger with built-in sensors

code: U3430

Datalogger is designed to record temperature, humidity and CO2. In case of exceeded set limits alarms are indicated by LED, LCD and acoustically by built-in beeper.

The recording is performed in a non-volatile electronic memory. The data can be transferred to a PC via USB-C.

Recorder includes Traceable calibration certificate with declared metrological traceability of etalons is based on requirements of **EN ISO/IEC 17025 standard.** 

## **Technical data**

| TEMPERATURE SENSOR        |                                                                                                                                  |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| Measuring range           | -20 to +60 °C                                                                                                                    |
| Accuracy                  | ±0.4 °C                                                                                                                          |
| Resolution                | 0.1 °C                                                                                                                           |
| HUMIDITY SENSOR           |                                                                                                                                  |
| Measuring range           | 0 to 100 % RH                                                                                                                    |
| Accuracy                  | ± 1.8 % RH                                                                                                                       |
| Resolution                | 0.1% RH                                                                                                                          |
| DEW POINT                 |                                                                                                                                  |
| Measuring range           | -60 to +60 °C                                                                                                                    |
| Accuracy                  | $\pm 1.5$ °C at ambient temperature T <25 °C and RH >30 %                                                                        |
| Resolution                | 0.1 °C                                                                                                                           |
| CO2 SENSOR                |                                                                                                                                  |
| Measuring range           | 0 to 5000 ppm                                                                                                                    |
| Accuracy                  | ±(50ppm +3% from reading) at 25°C and 1013hPa                                                                                    |
| Resolution                | 1 ppm                                                                                                                            |
