

Wireless thermometer, hygrometer barometer, sít Sigfox IoT

code: W7810

Wireless sensor measures temperature, humidity and pressure from built-in internal sensors. It features a simple, compact design and is positioned directly in the measured area.

Measured values are displayed on the display and are regularly sent, in an adjustable time interval from 10 min to 24 h, by radio transmission in Sigfox to [COMET Cloud](#). After the emergence of a new alarm (or the extinction of an alarm in progress), an extraordinary alarm message is sent at the latest within 10 minutes.

The device **includes Traceable calibration certificate** with declared metrological traceability of etalons is based on requirements of **EN ISO/IEC 17025 standard**.

Radio configuration zone RC1. More information about [Sigfox Radio Configurations \(RC\)](#).
